- Day means calendar day.
- In other arising situations where the valuation method cannot be determined, detailed instructions in the Valuation Manual approved by the Fund's Board of Representatives will be applied.

NAV = Total Assets - Total Liabilities.

NAV per fund unit (NAV/unit) = NAV/ total number of fund units in circulation at the trading day prior to the valuation date, and taken to 2 decimal places.

3. Commitment value from derivative contracts

- Commitment value (global exposure) is the value converted to money which securities investment funds/companies are parties with the obligation of contract implementation. The commitment value is determined upon the market value of outstanding assets, payment risks, market changes and the time necessary for position liquidation.
- In calculating the commitment value, fund management company may apply:
 - Net offset principle of derivative position (reverse) for the same outstanding security, for example the purchase position of XYZ securities call option reduces (makes up) the commitment value from the sale position of XYZ securities call option;
 - Net offset principle of derivative position and spot delivery position of the same security, for example the purchase position (holding) of XYZ securities makes up (reduces) the commitment value deriving from the sale position of XYZ securities call option ;
 - Other principles according to the international practice ensure the risk administration.

No.	Type of assets	Commitment value
1	Stock option (purchase of put option, sale of put option, sale of call option)	The market value of option position ¹ is adjusted by delta coefficient of option = Number of contracts x Volume of shares per contract x current market value of share x delta coefficient ²

2	Bond option (purchase of put option, sale of put option, sale of call option)	Market value of option position ³ is adjusted by delta coefficient of option = Number of contracts x nominal value x current market price of bonds x delta coefficient
3	Index future contract	Market value of future position = Number of contracts x value calculated on an index point x current index level
4	Bond future contract	Market value of future position = Number of contracts x value of contracts calculated under notional value x market value of the cheapest transferable bonds
5	Other contracts	Upon the model selected by the fund management company, agreed with the supervisory bank and approved by the fund representative board.

Note:

¹ If the fund holds long position, the market value may be adjusted to increase premium.

² Delta coefficient is the simple derivative of option price over underlying securities price. In the simple case, the delta coefficient may be considered 1. In case of complex option, the delta coefficient shall be determined by fund management companies, supervisory banks after being approved by the Fund Representative Board.

³ If the fund holds long position, the market value may be adjusted to increase premium.

Income of the Fund includes:

1. Dividend
2. Bond interest
3. Deposit interest
4. Difference between the sale and purchase arising from the investment activities of the Fund.
5. Other income, if any, from the investment of properties of the Fund.

ARTICLE 61. Dividend policy

1. The annual profit distribution is based on proposals of the BOR and approved by the General Meeting of investors.
2. Profits may be distributed in cash or by fund units. Distributed profits shall be deducted from remaining profit of fund. Fund management company shall only receive profit when fund already completes or is financially capable of fulfilling tax duties and other financial duties in accordance with regulations of laws; The amount paid to a fund unit is decided by the fund representative board.
3. Fund Management Company must deduct all taxes, fees, services fee regulated by laws when paying dividend.
4. DCBC's dividend shall be in cash or fund units. Only investors' identity being on fund's investor list, at the ex-dividend date, shall have right to receive dividend, regardless of who holds DCBC unit after ex-dividend date.
5. After receiving dividend, Fund Management Company have to public the following information:
 - Dividend distribution in cash or in fund unit.
 - Total profit during the reporting time and total accumulated profit since inception, detailing each of profit's categories.
 - Total distributed dividend amount, total new issued fund units (if dividend distribution would be in fund units).
 - Net asset value per fund unit before and after dividend distribution.
 - Other effects on DCBC's net asset value

Chapter XIII

PRICES OF SERVICE, FEES AND EXPENSES

ARTICLE 62. Prices of services paid by investors

1. Price of service of Subscription:
 - Price of service of Subscription is the price of service that investors pay to the Fund management company when buying a fund unit. This price of service of Subscription shall be payable upon the issuance and counted as a percentage of the subscription amount.
 - Price of service of Subscription is deducted against subscription amount before calculating the number of fund units distributed and paid to the fund management company.

- Price of service of Subscription is allowed to exceed five percents (5%) of the transaction value. Specific price of service rates must be announced in prospectuses, summary prospectuses, or on websites of fund management companies, distributors or in other forms.

The soonest day to apply the increased price of service rates is the 60th day from the date on which the fund management company announces new price of service rates on its website

In case that the fund management company obtains regulations causing the change in the price of service of subscription during a fixed period of time, the company shall announce on website of DCVFM and distribution agencies or under law. If there are more regulations on prices of service applicable at the same time, the provisions beneficial to investors will prevail.

2. Price of service of Redemption

- Price of service of Redemption is the price of service that investors must pay to the fund management company when selling a fund unit at the next subsequent trading cycles. Such Price of service is subtracted from redeemed amount and payable as the fund pays to investors and counted as a percentage of the redeemed amount.
- Price of service of Redemption at trading cycles is allowed to exceed five percents (5%) of the transaction value. Specific price of service rates must be announced in prospectuses, summary prospectuses, or on websites of fund management companies, distributors or in other forms.
Price of service of Redemption shall be 0.5% of the redeemed amount for converting fund certificates from close-ended fund certificates to open-ended fund holding by investors in the Investor List provided by the Vietnam Depository center (VSD) after the date of cancellation of depository of fund certificates.
- The holding period is determined by "first in, first out" principle (FIFO).
- The soonest day to apply the increased price of service rates is the 60th day from the date on which the fund management company announces new price of service rates on its website.

In case that the fund management company obtains regulations causing the change in the Price of service of Redemption during a fixed period of time, the company shall announce on website of DCVFM and distribution agencies or under law. If there are more regulations on prices of service applicable at the same time, the provisions beneficial to investors will prevail.

3. Price of service of Switching

- Investors shall pay Price of service of switching to the fund management company when placing switching order at trading cycle after the conversion of DCBC.
- Investors shall not pay any price of service of subscription or redemption for the switching units.
- Price of service of Switching is allowed to exceed three percents (3%) of the transaction value. Specific price of service rates must be announced in prospectuses, summary prospectuses, or on websites of fund management companies, distributors or in other forms.
- The soonest day to apply the increased price of service rates is the 60th day from the date on which the fund management company announces new fee rates on its website.

ARTICLE 63. Prices of services paid by the fund

1. Price of service of managing public securities investment fund (Price of service of Management)

- The maximum price of service of management is 2% of DCBC's NAV per fiscal year. This price of service is paid for DCVFM to carry out the fund management service for DCBC. This price of service applied for each period will be determined by DCVFM to ensure that the total amount of price of service of management and other fees (if any) paid by the fund to DCVFM comply with laws. When there is a change in price of service of management rate applied, DCVFM shall notify this change to the Board of Representatives and Supervising bank, and update this change in the Prospectus. DCVFM shall inform the price of Service of management rate applied for the period immediately after the fund conversion to the Board of Representatives and Supervising bank, and announce this rate on VFM's web site no later than the first valuation after the Fund is permitted to convert to open-ended fund.
- The monthly payable price of service is the total price of service calculated (accrued) of valuation cycles in a month.
- Price of service of Management of each valuation cycle is calculated as below:

Price of service of Management = price of service of management % per year x NAV on the day prior to the valuation day x actual days in the valuation cycle/ actual days in a year (365 or 366)

- In case that the fund shall value NAV monthly, the monthly price of service of management is calculated as below:

Monthly price of service of management = [price of service of management % per year x NAV on the day prior to the valuation day of the first valuation cycle in the month x actual remaining days from the beginning of the month to the day prior to the valuation day of the first valuation cycle in the month / actual days in a year (365 or 366)] + total price of service of management of the remaining valuation cycles in the month + [price of service of management % per year x NAV on the day prior to the valuation day of the last valuation cycle in the month x actual remaining days in the month/ actual days in a year (365 or 366)]

2. Price of service of Depository and supervision

- Price of service of Depository and supervision shall be paid to the Custodian and Supervising Bank for providing the custodian and supervising services for the Fund. This price of service is calculated at every valuation cycle based on the NAV of day prior to the valuation day and payable every month. The monthly price of service is the total price of service calculated (accrued) of valuation cycles in a month.

-Type of Price of service	The application period	Maximum of Price of service (NAV/year)	Minimum Price of service applied in any cases (VND/month)
Price of service of Supervision	From 1 April 2016	0.04%	23,000,000
Price of service of Depository	From 1 April 2016	0.04%	22,000,000

The above price of service does not include other regular operating fees such as fee payable to Depository center, legal fee, mailing fee, etc.

The total of price of service of supervision and depository is complied with law.

The monthly price of service is the total price of service calculated (accrued) of valuation cycles in a month.

- Price of service of Depository and supervision for DCBC at each valuation cycle is calculated as below:
Price of service of Depository and supervision (not include securities trading fee) = % Price of service of Depository and supervision (year) x NAV on the day prior to the valuation day x actual days by calendar of the valuation cycle/ actual days in a year (365 or 366)

- In case that the fund shall value NAV monthly, the monthly price of service of Depository and supervision is calculated as below:

Monthly price of service of Depository and supervision (not include securities trading fee) = [% Price of service of Depository and supervision (year) x NAV on the day prior to the valuation day of the first valuation cycle in the month x actual remaining days from the beginning of the month to the day prior to the valuation day of the first valuation cycle in the month / actual days in a year (365 or 366)] + total price of service of Depository and supervision of the remaining valuation cycles in the month + [% price of service of Depository and supervision (year) x NAV on the day prior to the valuation day of the last valuation cycle in the month x actual remaining days in the month/ actual days in a year (365 or 366)].
Details of Prices of service and payment term are regulated in the service agreement between FMC and the service provider.

3. Price of service of Fund administration

- Price of service of the fund administration is the price of service DCBC pay for the fund administration service provider.
- Price of service of the fund administration is **paid monthly as follows:**

Maximum of Price of service (NAV/year)	Minimum Price of service applied in any cases (VND/month)
0.03%	5,000,000

- the monthly payable price of service is the total price of service calculated (accrued) of valuation cycles in a month.
- Price of service of Fund administration for DCBC at each valuation cycle is calculated as below:
Price of service of Fund administration = % Price of service of fund administration (year) x NAV on the day prior to the valuation day x actual days of the valuation cycle/ actual days in a year (365 or 366)
- In case that the fund shall value NAV monthly, price of service of the monthly fund administration is calculated as below:
Price of service of Monthly fund administration= [% Price of service of fund administration (year) x NAV on the day prior to the valuation day of the first valuation cycle in the month x actual remaining days from the beginning of the month to the day prior to the valuation day/ actual days in a year (365 or 366)] + total Price of service of fund administration of the remaining valuation cycles in the month + [%Price of service of fund administration (year) x NAV on the day prior to the valuation day of the last valuation cycle in the month x actual remaining days in the month/ actual days in a year (365 or 366)].
Details of price of service and payment term are regulated in the service agreement between FMC and the service provider.

4. Other **Price of service** of related to Fund's asset trading

Type of Price of service	Price of service
Price of service of Securities transaction	100,000 VND/trade

- Price of service of Other transaction paid for Custodian bank will be stipulated in Contract between the fund management company and Custodian bank.
- the monthly payable price of service is the total price of service calculated (accrued) based on actual transaction trade of month
- Price of service of Other transaction include payable price of service to Securities company, legal firm, asset appraisal company and other party related to trade Fund's asset.
- These price of service are paid base on actual amounts.

5. **Price of service** of Transfer agent

- Price of service of transfer agent is the price of service the Fund pays for the transfer agent service-provider. This price of service pays for services mentioned in Clause 2 of Article 42 of this Charter and includes:
- Fixed monthly price of service of transfer agent is 10 million per month calculated (accrued) at valuation cycles in a month.
- Price of service of Subscription, redemption and switching is 0.01% of the transaction value of subscription, redemption and switching order, free for the first 400 transactions/month.
- Price of service for execution of right is 1,000,000 VND per one list for execution of right.
- The maximum price of service of transfer agent is 0.03% of NAV per year.
- Total minimum price of service of transfer agent is VND 96 millions per year (VND 8 millions per month). Always apply the price of service.
- Price of service of transfer agent will be recalculated based on the NAV average of year at the end of the year and will be adjusted on the first month of the next year (if any).
- The maximum price of service of TA is 0.03% of NAV per year. The NAV is used for this calculation is the average NAV within a month and the cap will be reviewed and adjusted monthly
- Details of prices of service and payment term are regulated in the service agreement between FMC and the transfer agent service provider.

❖ The above prices of service are exclusive of VAT (if applicable) in accordance with the law.
