- Liquidation value of a share is determined on basis of equity value of the issuer divided by the total number of outstanding shares.
- Day means calendar day.

- In other arising situations where the valuation method cannot be determined, detailed instructions in the Valuation Manual approved by the Fund's Board of Representatives will be applied.

NAV = Total Assets - Total Liabilities.

NAV per fund unit (NAV/unit) = NAV/ total number of fund units in circulation at the trading day prior to the valuation date, and taken to 2 decimal places.

3. Commitment value from derivative contracts

- Commitment value (global exposure) is the value converted to money which securities investment funds/companies are parties with the obligation of contract implementation. The commitment value is determined upon the market value of outstanding assets, payment risks, market changes and the time necessary for position liquidation.
- In calculating the commitment value, fund management company may apply:
 - Net offset principle of derivative position (reverse) for the same outstanding security, for example the purchase position of XYZ securities call option reduces (makes up) the commitment value from the sale position of XYZ securities call option;
 - Net offset principle of derivative position and spot delivery position of the same security, for example the purchase position (holding) of XYZ securities makes up (reduces) the commitment value deriving from the sale position of XYZ securities call option;
 - Other principles according to the international practice ensure the risk administration.

No.	Type of assets	Commitment value
1	Stock option (purchase of put option, sale of put option, sale of call option)	The market value of option position ¹ is adjusted by delta coefficient of option = Number of contracts x Volume of shares per contract x current market value of share x delta coefficient ²
2	Bond option (purchase of put option, sale of put option, sale of call option)	Market value of option position ³ is adjusted by delta coefficient of option = Number of contracts x nominal value x current market price of bonds x delta coefficient
3	Index future contract	Market value of future position = Number of contracts x value calculated on an index point x current index level
4	Bond future contract	Market value of future position = Number of contracts x value of contracts calculated under notional value x market value of the cheapest transferable bonds
5	Other contracts	Upon the model selected by the fund management company, agreed with the supervisory bank and approved by the fund representative board.

Note:

¹ If the fund holds long position, the market value may be adjusted to increase premium.

² Delta coefficient is the simple derivative of option price over underlying securities price. In the simple case, the delta coefficient may be considered 1. In case of complex option, the delta coefficient shall be determined by fund management companies, supervisory banks after being approved by the Fund Representative Board.

³ If the fund holds long position, the market value may be adjusted to increase premium.

Chapter XIII

PRICES OF SERVICE, FEES AND EXPENSES

ARTICLE 62. Prices of services paid by investors

1. Price of service of Subscription:
 - a. Price of service of Initial subscription

- Price of service of initial subscription is the price of service that investors pay when buying a fund unit at the issue of fund certificates to the public. This price of service shall be added to the par value of a fund unit and payable upon the issuance and counted as a percentage of the par value of a DCBF fund unit.
- This Price of service of Subscription is subtracted from the total subscription amount before calculating the number of distributed fund certificates
- Price of service of Subscription is allowed to exceed five percents (5%) of the transaction value. Specific price of service rates must be announced in prospectuses, summary prospectuses, or on websites of fund management companies, distributors or in other forms.
- The soonest day to apply the increased price of service rates is the 90th day from the date on which the fund management company announces new price of service rates on its website.

In case that the fund management company obtains regulations causing the change in the price of service subscription during a fixed period of time, the company shall announce on website of DCVFM and distribution agencies or under law. If there are more regulations on prices of service applicable at the same time, the provisions beneficial to investors will prevail.

b. Price of service of subscription at the next subsequent trading cycles

- Price of service of subscription is the price of service that investors pay when buying a fund unit at the next subsequent trading cycles. This price of service is counted as a percentage of the subscription amount of a fund unit and payable upon the issuance.
- Price of service of subscription is deducted against subscription amount before calculating the number of fund units distributed.
- Price of service of subscription shall be applied as the following: is allowed to exceed five percents (5%) of the transaction value. Specific price of service rates must be announced in prospectuses, summary prospectuses, or on websites of fund management companies, distributors or in other forms.
- The soonest day to apply the increased fee rates is the 60th day from the date on which the fund management company announces new price of service rates on its website. In case that the fund management company obtains regulations causing the change in the subscription fee during a fixed period of time, the company shall announce on website of DCVFM and distribution agencies or under law. If there are more regulations on prices of services applicable at the same time, the provisions beneficial to investors will prevail.

2. Price of service of redemption fee

- Price of service of redemption is the price of service that investors must pay when selling a fund unit at the next subsequent trading cycles. Such price of service is subtracted from redeemed amount and payable as the fund pays to investors and counted as a percentage of the redeemed amount.

- Price of service of redemption is allowed to exceed three percents (3%) of the transaction value. Specific price of service rates must be announced in prospectuses, summary prospectuses, or on websites of fund management companies, distributors or in other forms.
- The holding period is determined by “first in, first out” principle (FIFO).
- The soonest day to apply the increased price of service rates is the 60th day from the date on which the fund management company announces new price of service rates on its website.
- In case that the fund management company obtains regulations causing the change in the price of service of subscription during a fixed period of time, the company shall announce on website of DCVFM and distribution agencies or under law. If there are more regulations on prices of services applicable at the same time, the provisions beneficial to investors will prevail.

3. Price of service of switching

- Investors shall pay price of service of switching when placing switching order at trading cycles after the establishment of DCBF.
- Investors shall not pay any price of service of subscription or price of service of redemption for the switching units.
- Price of service of switching is allowed to exceed three percents (3%) of the transaction value. Specific price of service rates must be announced in prospectuses, summary prospectuses, or on websites of fund management companies, distributors or in other forms.
- The soonest day to apply the increased price of service rates is the 60th day from the date on which the fund management company announces new price of service rates on its website.

ARTICLE 63. Prices of services paid by the fund

1. Price of service of managing public securities investment fund (Price of service of Management)

- Price of service of Management is 1.2% of DCBF’s NAV per fiscal year. This price of service is paid to DCVFM for carrying out fund management services for DCBF.
- The monthly price of service is the total price of service calculated (accrued) at valuation cycles in a month.
- Price of service of Management for DCBF at each valuation cycle is calculated as below:

$$\text{Price of service of Management} = \% \text{ price of service of management (year)} / 12 \times \text{NAV on the day prior to the valuation day} \times \text{actual days in the valuation cycle} / \text{actual days in a year (365 or 366)}$$
- In case that the fund shall value NAV monthly, the monthly price of service of management is calculated as below:

$$\text{Monthly price of service of management} = [\% \text{ price of service of management (year)} \times \text{NAV on the day prior to the valuation day of the first valuation cycle in the month} \times$$

actual remaining days from the beginning of the month to the day prior to the valuation day/ actual days in a year (365 or 366)] + total price of service of management fees of the remaining valuation cycles in the month + [% price of service of management (year) x NAV on the day prior to the valuation day of the last valuation cycle in the month x actual remaining days in the month/ actual days in a year (365 or 366)]

2. Price of service of Depository and supervision

- Price of service of Depository and supervision shall be paid to the Supervisory Bank for providing the Supervisory Bank services and detailed in the Supervisory contract. Such price of service is calculated at every valuation cycle based on the NAV of day prior to the valuation day and payable every month. The monthly price of service is the total price of service calculated (accrued) at every valuation cycle in a month.
- The maximum supervision service price is 0.04% NAV/year.
- The maximum depository service price is 0.04% NAV/year.
- The above prices of services does not include transaction expenses that is VND 100.000/ 1 transaction
- Total price of service of Depository and supervision shall be complied with regulations of law.
- The above prices of services shall not include other fees such as fee payable to Depository center, legal fee, mailing fee, fee for change or cancel any trade, fee for registering nonlisted stock to listed stock or convertible bond to stock etc.
- Price of service of Depository and supervision for DCBF at each valuation cycle is calculated as below:
 Price of service of Depository and supervision (not include securities trading service expenses) = % price of service of Depository and supervision (year) x NAV on the day prior to the valuation day x actual days by calendar of the valuation cycle/ actual days in a year (365 or 366)
- In case that the fund shall valuate NAV monthly, the monthly price of service of Depository and supervision is calculated as below:
 Monthly price of service of Depository and supervision (not include securities tradingservice expenses) = [% price of service of depository and supervision (year) x NAV on the day prior to the valuation day of the first valuation cycle in the month x actual remaining days from the beginning of the month to the day prior to the valuation day/ actual days in a year (365 or 366)] + total price of service of Depository and supervision of the remaining valuation cycles in the month + [% price of service of depository and supervision (year) x NAV on the day prior to the valuation day of the last valuation cycle in the month x actual remaining days in the month/ actual days in a year (365 or 366)]
- Service rates and payment methods are specified in Agreement between FMC and Service Provider.

3. Price of service of fund administration

- Price of service of The fund administration shall be paid to the fund administration service provider by the DCBF fund.
- The maximum price of fund management service is 0.03% NAV/year

- The monthly Price of service is the total Price of service calculated (accrued) at valuation cycles in a month.
- Price of service of Fund administration for DCBF at each valuation cycle is calculated as below:
Price of service of Fund administration = % Price of service of fund administration (year) x NAV on the day prior to the valuation day x actual days by calendar of the valuation cycle/ actual days in a year (365 or 366)
- In case that the fund shall value NAV monthly, the monthly Price of service of fund administration is calculated as below:
Monthly Price of service of fund administration = [% Price of service of fund administration (year) x NAV on the day prior to the valuation day of the first valuation cycle in the month x actual remaining days from the beginning of the month to the day prior to the valuation day/ actual days in a year (365 or 366)] + total Prices of service of fund administration of the remaining valuation cycles in the month + [% Price of service of fund administration (year) x NAV on the day prior to the valuation day of the last valuation cycle in the month x actual remaining days in the month/ actual days in a year (365 or 366)]
- Service rates and payment methods are specified in Agreement between FMC and Service Provider.
- The total minimum monthly expenses for Supervision and Depository services, fund management services and the details of amounts are specified in the agreement of depository, supervision and fund administration services.

4. Price of service of Transfer agent

- Transfer agent service price is the price paid by Fund to the Transfer Agency Service Provider. Transfer agency service prices are announced in the prospectus, summary prospectus, on the website of the fund management company, distribution agent or in other forms.
- The formula for calculating the service price for transfer agent services in each valuation period in a month is determined as follows:
Transfer agent service price for the valuation period = Monthly transfer agent service price / actual number of days of the month x actual calendar days of the valuation cycle
- Service price and method of service fee payment are specified in the contract between the Fund Management Company and the Transfer Agency Service Provider. In addition, the Fund will pay the costs related to the exercise of rights for Transfer Agency Service Provider as agreed in the contract.

From time to time, Fund Management Company would be able to change the limit on the total operating expenses ratio (TERo) (after deducting relating investment fees) in order to provide the best support for Investors. Details and effectiveness of TERo limit (if any) will be updated in the Fund's Prospectus and disclosed on the Fund Management Company's website.

ARTICLE 64. The fund's expenses

Expenses of the fund shall include expenses as follows:

1. Asset management fees paid to the fund management company;
