VOTING CONTENTS

To: Valued Investors

Dragon Capital VietNam Investment Fund Management Joint Stock Company submits to the Annual General Meeting of Investors Financial year 2022 of DC Dynamic Securities Fund (DCDS) the voting contents for approval as follows:

I. Fund's performance in 2022

At the end of fiscal year 2022, net asset value per share (NAVPS) of DCDS decreased 34.4% compared to the end of 2021, while VN-Index also fell by 32.8% over the same period. The Fund's performance did not meet expectation due to following reasons.

Firstly, 2022 was an extremely volatile year with many events taking place in the world as well as in Vietnam. In terms of economics, global major Central Banks have kept interest rates at a low level to maintain growth for many years, especially by launching huge monetary policy packages to support economic growth during Covid pandemic. This action has put huge pressure on money supply and inflation. In terms of geopolitics, the Russian-Ukrainian conflict broke out, further exacerbating the problems of supply chain disruptions, rising prices of basic goods especially food and energy prices.

With an aim to deal with the accelerating and getting out of control inflation, the US and Western countries government have tightened monetary policies as well as rapidly raised interest rates. These measures put enormous pressure on global economic growth, increased recession risks and rattled financial markets.

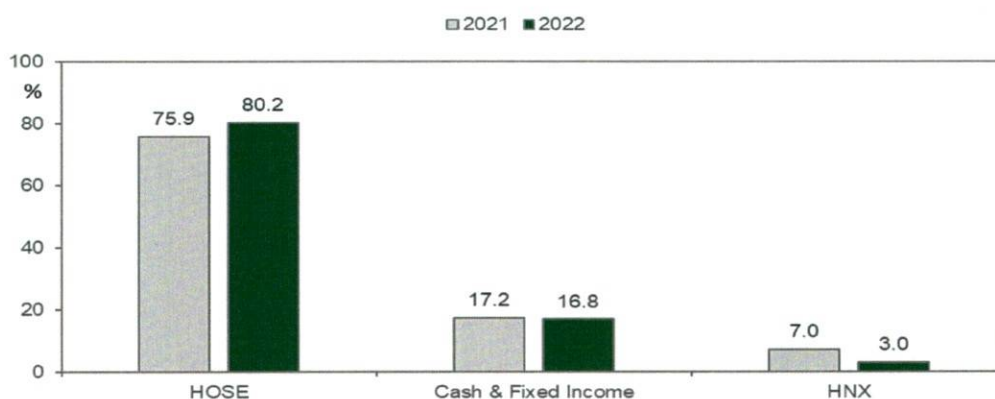

Secondly, besides the abovementioned political and economic risks, Vietnam also had its own stories in the past year. Corporate bond market revealed many uncertainties, leading to a series of violations of individuals and businesses and causing a sharp decline in liquidity of real estate market as well as FDI sector and export enterprises due to weak demand.

Both domestic and international fluctuations have negatively affected the Fund's investments. Especially, group of investments in cyclical industries declined faster and stronger than general market, resulting in the negative Fund's performance. However, in the second half of 2022, DCDS has quickly recovered and proactively restructured its asset allocation to react faster amid volatile market. As a result, the Fund's performance has improved remarkably compared to its benchmark in the second half of the year.

III. 2022 Dividend Distribution

DCDS Fund proposes not to pay dividend in 2022 and reinvest to increase net asset value of the Fund.

IV. Fund's operation plan in 2023

In 2023, Vietnam's economy and stock market are forecasted to have many difficulties and challenges due to outstanding internal problems that need time to be resolved thoroughly. However, there are a few bright spots regarding improving domestic macro conditions: inflation is under control, exchange rate is stable, enabling the government to loosen monetary policy and reduce lending interest rates. The stock market after a year of volatilities has reached an attractive valuation for long-term investors. Therefore, the Fund will focus on risk management

while also flexibly take advantage of market fluctuations to seek investment opportunities. Depending on the appropriate time, the Fund will choose to disburse into stocks with good fundamentals, healthy financials and attractive valuation.

V. Fund's auditor selection in 2023
