RESOLUTES

The Voting Issues Of The Annual Meeting Of Financial Year 2020 ("The Voting") unanimously passed the Resolution as follows:

Article 1: Reports on operation result of the Fund in 2020.

The Voting unanimously agreed Reports on operation result of the Fund in 2020 as follow:

VSF's net asset value per share rose by 18.1% in 2020, vs a 14.9% gain by the VN Index. As of 31 Dec 2020, VSF held 24 stocks. Its Top-10 holdings accounted for 62.4% of NAV. The largest holdings by sector were banks (23.1%), real estate (16.6%), retail (15.9%), materials (12.9%) and software & services (8.6%).

The banking sector accounted for an average of 21.4% NAV – the highest proportion in VSF's portfolio. Banks contributed 10.4% to VSF's overall performance, driven by strong performances by ACB, VPB, TCB, MBB, VIB and CTG. Asia Commercial Bank (ACB) was the Fund's top performer in 2020. The bank had a credit growth rate of +15.7% yoy, higher than the average growth of the banking sector and it has the financial capacity to continue growing steadily into the future. Its NPAT rose by 27.8% yoy in 2020 to VND 7,683bn, while NIM and ROE increased by 3.5% and 24.3%, respectively. Asset quality improved, with an NPL ratio at just 0.6%. ACB will start booking a prepaid fee of VND 8,500bn for exclusive insurance (Bancassurance) from 2021 over a 15-year plan. We expect ACB to be added to some index baskets, including the VNDiamond in April 2021, the VN30 in June 2021, and some other indexes.

The second largest sector in VSF's portfolio was real estate, which accounted for an average of 18.7% of NAV. The sector contributed just 1.0% to the Fund's results due to the negative impact from

COVID-19, which caused difficulties for companies in residential and commercial real estate for which very few projects were licensed.

Retailing accounted for an average of 14.7% of the Fund's NAV, making it the third-largest sector in VSF's portfolio. The sector contributed -2.4% to VSF's performance as the Fund invested in Mobile World Investment Corporation (MWG) and Phu Nhuan Jewelry (PNJ), while the sector faced strong headwinds in 2020 due to COVID-19. Despite this unprecedented event, MWG recorded revenue growth of 6.2% yoy to VND 108,546bn while profit after tax increased 2.2% yoy to VND 3,918bn thanks to cost optimization and an improvement in gross margin to 22.1% - the highest level ever, thanks to (a) diversifying its product portfolio (b) focusing on boosting sales of high-margin products and (c) improving commercial terms with suppliers due to the advantage of large-scale buying.

Software & services were VSF's fourth-largest sector at an average of 8.0% of NAV. The sector contributed 1.9% to VSF's performance for the year. FPT Group (FPT) was the Fund's only holding in the sector. Due to the worldwide impact of COVID-19, FPT had difficulties in signing new contracts, which directly affected the growth of its technology orders. However, FPT still maintained positive revenue growth of 7.6% yoy to VND 29,830bn. Profit after tax in 2020 also increased by 12.8% yoy to VND 3,538bn. We believe that technology is becoming more important to the viability and growth of businesses. Meanwhile, COVID-19 has accelerated the wave of digital transformation and technology investment in many enterprises, creating opportunities for sustainable development for pioneering technology companies, of which FPT is the leader.

Materials accounted for an average of 6.7% of VSF's NAV and contributed 7.2% to the Fund's gain vs 5.6% for the sector to the VN Index. Hoa Phat Group (HPG) was the Fund's only holding in the sector. In 2020, HPG recorded net revenue of VND 90,119 bn, +41.6% yoy, and earnings after tax of VND 13,439bn (+78.5% yoy). We believe that HPG's revenue and profit after tax will continue to soar in 2021 thanks to: (a) strong HRC output, (b) construction steel volume estimated to reach 4.5m tons, (c) increased market share, and (d) HRC selling price and construction steel gradually rising, helping improve profit margins.

Other sectors and stocks with outstanding profitability in VSF's portfolio include transportation (Viettel Post - VTP, Airports Corporation of Vietnam - ACV) and insurance (Bao Viet Holdings - BVH). Meanwhile, the utilities and energy sectors did not do well compared to the market average

2020 was a difficult and challenging year for economies throughout the world. Still, Vietnam's economy managed to grow by 2.9% yoy, making it one of the fastest growing countries in the world. Low interest rates, stimulus packages and infrastructure development should give strong support to economic growth in general and to the stock market and real estate in particular.

In 2021, VSF continues looking for investment opportunities in companies with solid fundamentals whose stock prices do not yet fully reflect their long-term growth potential. Regarding asset allocation, VSF intends to focus on the real estate, banking, materials, retail, and software & services sectors.
