**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2022****10 FINANCIAL RISK MANAGEMENT AND FAIR VALUE**

On 6 November 2009, the Ministry of Finance issued Circular 210/2009/TT-BTC providing guidance on the application of International Accounting Standards regarding the presentation and disclosure of financial instruments (“Circular 210/2009/TT-BTC”), which is applicable for fiscal years beginning on or after 1 January 2011. Circular 210/2009/TT-BTC provides definitions of financial instruments, classification, presentation and disclosure including financial risk management policies and fair value of financial instruments.

The Fund has exposure to the following risks from financial instruments:

Credit risk
Liquidity risk
Market risk

The Fund’s investment portfolio comprises listed public fund certificates, unlisted public fund certificates, Government bonds, and cash at bank. Management of the Fund Management Company has been given a discretionary authority to manage the Fund’s assets in compliance with the Fund’s investment objectives. Compliance with the investment restrictions and target asset allocation is monitored by the Supervising Bank. If any deviation from target asset allocation is found, the investment portfolio shall be adjusted by the Fund Management Company to comply with the established restrictions.

(a) Credit risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered with the Fund, resulting in a financial loss to the Fund. It arises principally from cash at banks, investments in debt securities and receivables.

All current cash at bank was placed with financial institutions where the Fund did not expect any losses arising from their operations.

The Fund’s securities will only be traded on the Ho Chi Minh City Stock Exchange and the Hanoi Stock Exchange or with counterparties which have a specified credit rating. All securities transactions are settled or paid for upon receipt/ delivery of securities via approved brokers. The risk of default is considered minimal since the delivery of securities for sales transaction is only made once payment has been received and delivery of funds for purchase transaction is only made once the securities have been received. If either party fails to meet their obligations, the trade will fail.

Receivables include interest and coupon receivables. Credit risk relating to such receivables is considered minimal due to the good credit worthiness of the counterparties and short settlement period.

The maximum exposure to credit risk faced by the Fund is equal to the carrying amounts of cash at bank, investment in debt securities and receivables.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2022****10 FINANCIAL RISK MANAGEMENT AND FAIR VALUE (continued)****(b) Liquidity risk**

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. Pension funds face high risk of liquidity due to obligation to redeem its fund certificates from fund participants.

The Fund's approach to managing liquidity risk is to maintain a highly liquid investment portfolio which comprises listed securities and bank deposits to meet its liquidity requirements in the short and long term.

As at 31 December 2022, all of the Fund's liabilities were due within 1 year.

As at 31 December 2022, there was no obligation relating to derivative financial instruments.

(c) Market risk

Market risk is the risk that changes in market prices, such as interest rates, foreign exchange rates and market prices will affect the Fund's income or the value of its investment portfolio.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of the Fund's financial instruments will fluctuate as a result of changes in market interest rates. This risk arises when the market interest rate increases, the value of fixed income instruments held by the Fund, such as listed bonds, term deposits decreases, especially for long-term investments.

Details of interest rates and maturity of Government bonds and term deposits are presented in Note 6.2.

Currency risk

Currency risk is the risk that the value of the Fund's financial instruments will be affected by changes in exchange rates. The Fund is not exposed to currency risk as the Fund's assets and liabilities are denominated in Vietnamese Dong, which is also the Fund's accounting currency.

Market price risk

Market price risk is the risk that the value of the financial instruments will decrease as a result of change in securities indices and the values of individual securities.

The Fund has invested in securities that are affected by market price risk arising from the uncertainty in the fluctuation of their future market value. Market price risk is managed by the Fund Management Company by diversifying the investment portfolio and prudent selection of securities within investment restrictions.

As at 31 December 2022, if market price of public fund certificates had increased/decreased by 10% with all other variables (including tax rate) being held constant, the net asset value of the Fund would have been higher/lower by VND799,565,308 (as at 31 December 2021: VND1,512,755,692).

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2022****10 FINANCIAL RISK MANAGEMENT AND FAIR VALUE (continued)****(d) Fair value of financial assets and liabilities**

Financial assets of the Fund comprise:

- Cash;
- Equities of other entities;
- A contractual right:
 - To receive cash or other financial assets from other entities; or
 - To exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the Fund;
- A contract that will or may be settled in the Fund's own equity instruments.

Financial liabilities are contractual obligations to deliver cash or another financial asset to another entity or to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the Fund or contracts that will or may be settled in the Fund's own equity instruments.

Fair value is the amount for which an asset could be exchanged, or a liability settled between knowledgeable, willing parties in an arm's length transaction.

Fair value measurement approach has not been stipulated in Circular 210/2009/TT-BTC and Vietnamese Accounting Standards, Circular 198/2012/TT-BTC issued by the Ministry of Finance on 15 November 2012, Circular 98/2020/TT-BTC issued by the Ministry of Finance on 16 November 2020 and prevailing regulations on preparation and presentation of financial statements applicable to voluntary supplemental pension funds.

Therefore, the Fund applies method to determine net asset value in accordance with Circular 98/2020/TT-BTC, the Fund's Charter and valuation manual approved by the Board of Representatives to determine fair value of the Fund's financial assets including cash and cash equivalents and investments. Fair value of the Fund's other financial assets and financial liabilities approximate their carrying value due to short-term maturity of these financial instruments.
