3 MARKET UPDATES

As at 30 June 2023, CPI slightly increased 2.0% YoY. PMI improved to 46.2, slightly up from 45.3 last month, though it still lags behind February's 51.2 - marking the fourth consecutive month below 50. GDP growth increased 4.14% YoY and 3.72% YTD, being low in periodic comparison but surpassing expectations. FDI registration advanced to \$13.4bn (-4.5% YoY) and disbursement was \$10.0bn YTD (+0.2% YoY). Exports for 6 months 2023 were at \$164.5bn (-11.4% YoY), with imports totaling \$152.2bn (-18.2% YoY). Consequently, the trade surplus was at \$12.25bn, a significant increase from the \$1.2bn compared to the same period last year. The key driver was a reduction in imports, which may hint at weaker prospects, in line with the low PMI. The VND experienced a depreciation of 0.37% MoM due to surplus liquidity in the Vietnam banking system. Despite the DXY index adjusting down to 102.9 at month-end, the money market rate in Vietnam fell to below 1%, creating a negative swap rate and exerting pressure on foreign exchange.

3 MARKET UPDATES (continued)

During the first 6 months of 2023, there have been 4 times that SBV announced downward adjustments on policy rates, totaling roughly 1%-1.5% across all terms. The overnight money market rate dropped dramatically to 0.3% from 4% at the end of May, and rates for 1-month and 3-month terms decreased to 3.0% and 4.8% respectively (a reduction of 0.8%-1.5% MoM). Deposit rates followed suit, decreasing by about 25-50bps. Despite this, credit growth in the banking system continued to pose a challenge; by 15 June 2023, credit was at 3.4% YTD and 8.9% YoY, significantly below the 2023 full year target of 20%.

Regarding Government bonds (VGBs), the primary issuance plan for FY23 is VND400tn (\$17bn), with 10-15-year tenors accounting for 72.5% of issuances. By the end of the first 6 months of 2023, the total issuance amounted to VND179.9tn YTD (\$7.7bn), equivalent to 45% of the full-year target. In response to the demanding market, the State Treasury lowered the weekly target to boost the fill-up ratio. Given the positive sentiment in the interest rate market, VGBs enjoyed another month of reduced rates and high fill-up ratios. Primary yields dropped 20-50bps across tenors from 5 to 30 years, a significant movement for one month, albeit with declining volume from April. The secondary yield curve saw a substantial downward shift of 35-53bps, with the most pronounced moves in the 10 and 15-year tenors. Since March, the yield curve has moved down by approximately 200bps, settling in the range of 2.3%-2.9% for 1 to 15 year tenors. The gap between primary and secondary yields narrowed to below 10-15bps, down from 30-40bps in February.

The total outright trading volume on the secondary market amounted to VND443.56tn (\$18.84bn) in the first 6 months of 2023, with daily transactions equivalent to VND3.52tn/day (-40% and -38% respectively YoY). REPOs saw a 50% reduction YoY to VND236.3tn in the first half of 2023 or VND1.9tn/day. Foreign investors continued net-selling in 6 months of 2023, totaling approximately VND4.53tn (+44% YoY). Tenors from 5 to 15 years remained the most traded, accounting for over 70% of total outright transactions.

The major amendments of Decree 8 include: (a) allowing issuers to renegotiate terms by up to two years; (b) giving holders the option to receive cash or assets as repayment; (c) extending the deadline until year-end for the requirement of professional investor status and professional credit rating requirements. The first point offers a crucial framework for bond restructuring, but it will require concerted efforts from all market participants, including bond issuers, holders, intermediaries, and banks. Recently, news emerged about the imminent launch of a dedicated platform for private corporate bonds with T+0 settlement by HNX in July. This marks a significant step for the corporate bond market, centralized information and enhanced transparency. Of the total amount of approximately VND300tn (\$12.8bn) maturing in 2023, it is estimated that around 30 issuers have successfully extended the maturity for two years, totaling VND36tn (\$1.53bn); 62 issuers are still in default or technical default and are currently in negotiation progress.

4 DETAILS OF THE FUND'S PERFORMANCE RESULTS (continued)

4.1 Details of the Fund's performance indicators (continued)

5 MARKET PROSPECTS

The upward pattern of global interest rates showed decreasing pace whilst the interest rates in Vietnam have tendency to fall in 2023.

In terms of government bonds, in 2023, with improved liquidity in the banking system and the direction of SBV in decreasing interest rates, the interest rates of government bonds decline and are potentially maintained at low level.

Regarding corporate bonds, since the end of Q1/2023, the market gradually recovered along with higher demand for new investments, which was thanks to the stable macroeconomic environment in paralel with the enforcement of Decree 08/2023 in relation to bond restructuring that tackle relevant market difficulties. In addition, with the implementation of private corporate bonds trading system in the second half of 2023, the corporate bond market is expected to have enhanced transparency and centralised information, thereby gaining momentum for sustainable development.

Responsibility of management of Dragon Capital VietFund Management Joint Stock Company (“the Fund Management Company”)

Management of the Fund Management Company is responsible for the preparation and the true and fair presentation of the interim financial statements of the Fund in accordance with Vietnamese Accounting Standards, the Vietnamese Accounting System applicable to open-ended investment funds including Circular 198/2012/TT-BTC issued by the Ministry of Finance on 15 November 2012 on the promulgation of accounting system for open-ended investment funds (“Circular 198/2012/TT-BTC”), Circular 181/2015/TT-BTC issued by the Ministry of Finance on 13 November 2015 on the promulgation of accounting system for exchange-traded funds and open-ended investment funds (“Circular 181/2015/TT-BTC”), Circular 98/2020/TT-BTC issued by the Ministry of Finance on 16 November 2020 providing guidance on operation and management of securities investment funds (“Circular 98/2020/TT-BTC”) and prevailing regulations on preparation and presentation of financial statements applicable to open-ended investment funds, and for such internal control which management determines is necessary to enable the preparation and presentation of the interim financial statements that are free from material misstatement, whether due to fraud or error.

Auditor’s Responsibility

Our responsibility is to express a conclusion on the interim financial statements based on our review. We conducted our review in accordance with Vietnamese Standard on Review Engagements 2410 – *Review of Interim Financial Information Performed by the Independent Auditor of the Entity*.

A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Vietnamese Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial statements do not present fairly, in all material respects, the financial position and the investment portfolio of the Fund as at 30 June 2023, and the results of its operations, changes in net asset value, subscriptions and redemptions of fund certificates, and cash flows for the six-month period then ended in accordance with Vietnamese Accounting Standards, the Vietnamese Accounting System applicable to open-ended investment funds including Circular 198/2012/TT-BTC, Circular 181/2015/TT-BTC, Circular 98/2020/TT-BTC and prevailing regulations on preparation and presentation of financial statements applicable to open-ended investment funds.

Other Matter

The report on the review of interim financial statements is prepared in Vietnamese and English. Should there be any conflict between the Vietnamese and English versions, the Vietnamese version shall take precedence.

**NOTES TO THE INTERIM FINANCIAL STATEMENTS
FOR THE SIX-MONTH PERIOD ENDED 30 JUNE 2023****4 SIGNIFICANT ACCOUNTING POLICIES (continued)****4.2 Investments (continued)*****Valuation bases (continued)******(a) Listed bonds (continued)***

- If a bond is approved for listing but has not yet traded prior to the valuation date, its valuation base is determined as if the bond is unlisted.
- If the bond is delisted as its maturity date is approaching, its valuation base is determined using valuation techniques approved by the Board of Representatives plus accumulated interest. Valuation bases of bonds delisted because of other reasons are determined by the Board of Representatives on a case-by-case basis.

Accumulated accrued interest on bonds is recognised and presented as a receivable in the interim statement of financial position and statement of portfolio.

10 FINANCIAL RISK MANAGEMENT AND FAIR VALUE

On 6 November 2009, the Ministry of Finance issued Circular 210/2009/TT-BTC providing guidance on the application of International Accounting Standards regarding the presentation and disclosure of financial instruments ("Circular 210/2009/TT-BTC"), which is applicable for fiscal years beginning on or after 1 January 2011. Circular 210/2009/TT-BTC provides definitions of financial instruments, classification, presentation and disclosure including financial risk management policies and fair value of financial instruments.

The Fund has exposure to the following risks from financial instruments:

Credit risk;
Liquidity risk; and
Market risk

The Fund's investment portfolio comprises listed bonds and unlisted bonds, transferable certificates of deposit, cash and term deposits at bank. Board of Management of the Fund Management Company has been given a discretionary authority to manage the Fund's assets in compliance with the Fund's investment objectives. Compliance with the investment restrictions is monitored by the Supervisory Bank on a weekly basis. If any breach to the investment restrictions is found, the investment portfolio shall be adjusted by the Fund Management Company to comply with the established restrictions.

(a) Credit risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered with the Fund, resulting in a financial loss to the Fund. It arises principally from cash and term deposits at banks, certificates of deposit, debt instruments, and receivables.

All current accounts and term deposits and certificates of deposit were placed with or issued by financial institutions where the Fund expect losses arising from their operations are unlikely.

**NOTES TO THE INTERIM FINANCIAL STATEMENTS
FOR THE SIX-MONTH PERIOD ENDED 30 JUNE 2023****10 FINANCIAL RISK MANAGEMENT AND FAIR VALUE (continued)****(a) Credit risk (continued)**

Corporate bonds in the Fund's investment portfolio are issued by listed entities whose the issuance plans are approved by the State Securities Commission. Investment proposals in these bonds are approved in accordance with the Fund's investment policy. Information on the collateral of these bonds is presented in Note 6.2(b).

The Fund's securities will only be traded on the Ho Chi Minh City Stock Exchange and the Hanoi Stock Exchange or with counterparties which have a specified credit rating. All securities transactions are settled or paid for upon receipt/ delivery of securities via approved brokers. The risk of default is considered minimal since the delivery of securities for sales transaction is only made once payment has been received and delivery of funds for purchase transaction is only made once the securities have been received. If either party fails to meet their obligations, the trade will fail.

Receivables include receivables from trades of bonds, interest receivables from term deposits, certificates of deposit and bonds. Credit risk relating to such receivables is considered not significant due to the fact that receivables account for a small proportion of the portfolio (as at 30 June 2023: 3.34%, as at 31 December 2022: 2.32%) and there are no overdue receivables as at the reporting date and the issuance date of this report.

The maximum exposure to credit risk faced by the Fund is equal to the carrying amounts of bank balances, certificates of deposit, bonds, and receivables.

(b) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. Open-ended funds face high risk of liquidity due to obligation to redeem its fund certificates from fund certificate holders.

The Fund's approach to managing liquidity risk is to maintain a highly liquid investment portfolio which comprises listed securities and bank deposits to meet its liquidity requirements in the short and long term.

As at 30 June 2023 and 31 December 2022, all the Fund's liabilities were due within 1 year.

As at 30 June 2023 and 31 December 2022, there was no obligation relating to derivative financial instruments.

(c) Market risk

Market risk is the risk that changes in market prices, such as interest rates, foreign exchange rates and market prices will affect the Fund's income or the value of its investment portfolio.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of the Fund's financial instruments will fluctuate as a result of changes in market interest rates. This risk arises when the market interest rate increases, the value of fixed income instruments held by the Fund, such as corporate bonds, term deposits and transferable certificates of deposit, decreases.

**NOTES TO THE INTERIM FINANCIAL STATEMENTS
FOR THE SIX-MONTH PERIOD ENDED 30 JUNE 2023****10 FINANCIAL RISK MANAGEMENT AND FAIR VALUE (continued)****(c) Market risk (continued)***Interest rate risk (continued)*

All corporate bonds and certificates of deposit held by the Fund have fixed interest rates or variable interest rates with a base rate referenced to 12-month VND deposit rates quoted by large Vietnamese commercial banks. Details of interest rates of term deposits, corporate bonds and transferable certificates of deposit are presented in Note 6.1 and Note 6.2.

Fund Management Company manage interest rate risk by analysing market competition to have the interest rates that benefit for the Fund's purposes and within the limit of risk management.

Currency risk

Currency risk is the risk that the value of the Fund's financial instruments will be affected by changes in exchange rates. The Fund is not exposed to currency risk as the Fund's assets and liabilities are denominated in Vietnamese Dong, which is also the Fund's accounting currency.

Market price risk

Market price risk is the risk that the value of the financial instruments will decrease as a result of change in securities indices and the values of individual securities.

The Fund has invested in securities that are affected by market price risk arising from the uncertainty in the fluctuation of their future market value. Market price risk is managed by the Fund Management Company by diversifying the investment portfolio and prudent selection of securities within investment restrictions.

As at 30 June 2023, if market price of bonds had increased/decreased by 1% with all other variables (including tax rate) being held constant, the net asset value of the Fund would have been higher/lower by VND3,152,484,171 (as at 31 December 2022: VND3,107,984,607).

(d) Fair value of financial assets and liabilities

According to Circular 210/2009/TT-BTC, financial assets comprise:

- Cash;
- Equity instruments of other entities;
- A contractual right:
 - To receive cash or other financial assets from other entities; or
 - To exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity.
- A contract that will or may be settled in the entity's own equity instruments.

Financial liabilities are contractual obligations to deliver cash or another financial asset to another entity or to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the entity or contracts that will or may be settled in the entity's own equity instruments.

Fair value is the amount for which an asset could be exchanged, or a liability settled between knowledgeable, willing parties in an arm's length transaction.

FOR THE SIX-MONTH PERIOD ENDED 30 JUNE 2023**

10 FINANCIAL RISK MANAGEMENT AND FAIR VALUE (continued)

(d) Fair value of financial assets and liabilities (continued)

Fair value measurement approach has not been stipulated in neither Circular 210/2009/TT-BTC nor Vietnamese Accounting Standards, Circular 198/2012/TT-BTC, Circular 181/2015/TT-BTC, Circular 98/2020/TT-BTC and prevailing regulations on preparation and presentation of financial statements applicable to open-ended investment funds.

Therefore, the Fund applies method of NAV valuation in accordance with Circular 98/2020/TT-BTC, the Fund's Charter and valuation manual approved by the Board of Representatives to determine fair value of the Fund's financial assets including cash and cash equivalents and investments. Fair value of the Fund's other financial assets and financial liabilities approximate their carrying value due to short-term maturity of these financial instruments.
